Amasala Venkata Siva Sai Tejesh

Machine Learning Engineer — Computer Science Undergraduate (2027)

Bangalore, India | +91-9381488289 | asaitejesh123@gmail.com | LinkedIn: linkedin.com/in/sai-tejesh-a-70582a317 | GitHub: github.com/saitejesh2508

Profile Summary

Computer Science undergraduate (2027) who builds ML and LLM systems end to end: a RAG chatbot answering in under 2 seconds over 10,000+ pages, a hybrid log classifier at 99.47% accuracy, and an OCR pipeline at 98% accuracy. Experience with PyTorch, TensorFlow, LangChain and cloud platforms; interested in agentic AI and MCP-based systems.

Education

RK College of Engineering (JNTU Kakinada affiliated) Expected 2027

Bachelor of Technology in Computer Science Engineering — CGPA: 7.15 / 10.00

Narayana Junior College, Narasimhakonda — Intermediate (12th Grade): 81.2%

Narayana E.M. High School, Kavali — 10th Grade: GPA 10 / 10

Skills

- **Languages:** Python, SQL, Java, C, Bash Scripting
- **ML & Deep Learning:** PyTorch, TensorFlow, scikit-learn, spaCy, NLTK, OpenCV, Sentence Transformers
- **LLM Systems:** RAG, LangChain, Vector Databases, Agentic AI, MCP Server
- **Deployment & MLOps:** Flask, Streamlit, GitHub, Linux, Jenkins, MLOps
- **Cloud & Compute:** Azure, Google Cloud, SLURM HPC Clusters

Projects

AI-Powered Medical Chatbot (RAG) — *Python, LangChain, LLM, Vector Databases*

- Built and optimised an end-to-end **RAG** chatbot: document chunking, embeddings, **vector search** and LLM answer generation over **10+ textbooks** (**10,000+ pages**).
- Reduced average response time to under **2 seconds** for real-time retrieval; achieved **85% query coverage**.

Hybrid Log Classification System — *Python, Pandas, KNN, DBSCAN, Sentence Transformers*

- Designed a layered model pipeline: Regex for known patterns, **KNN over Sentence-Transformer embeddings** for semantic matches, **DBSCAN** for unseen patterns.
- Achieved **99.47% accuracy**, reducing human effort by **70%** and speeding up incident response by **30%**.

Prescription Information Extraction using OCR — *Python, OpenCV, Tesseract*

- Built a computer-vision pipeline (**OpenCV**, **Tesseract**) with adaptive thresholding and regex field extraction over **1,000+ prescriptions**.
- Achieved **98% accuracy**; reduced manual entry by **75%** and transcription errors by **40%**.

AI Career Twin (B.Tech Major Project) — *Full-Stack: Frontend, Backend, Database*

- Building an AI-powered career-readiness analyzer that matches a student's profile against a target job role and **identifies skill gaps**.
- Full-stack build integrating frontend, backend and database around the AI component.

Certifications

- Master Machine Learning for Data Science & AI (**Code Basics**)
- Generative AI Leader — Google Cloud course (**Udemy**)

Achievements

- Winner, **Code Hunt Hackathon — TECHNORK'26** (conducted by VXL IT Solutions)
